Projects

Bank Management System
- The Bank Management System is a application for maintaining a person's account in a bank.
- It's a desktop based application and in this project I tried to show the working of a banking account system and covered the basic functionality of a Bank Account.
- This project is primarily based on Java using swing for the GUI of the application, AWT for some predefined methods of MYSQL databases used by which all banking customers can log in through the application by their account login Id and password.
- Software used- Eclipse IDE, MySQL workbench

Interest

- **Coding**
